## REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Claim 23 has been found to be allowable over the prior art because the prior art fails to teach or suggest a time display device comprising a pattern toggle member adapted to be placed in a first position and a second position, wherein the first position of the toggle member selects a first image display, and the second position of said toggle member selects a second image display, wherein a hours group pattern, a minutes group pattern, a day group pattern and a month group pattern is of discrete and discernable contrast relative to the display area and is visually distinguishable from the other ones of said hours group pattern, said minutes group pattern, said day group pattern, and said month group pattern, each of said hours group pattern, said minutes group pattern, said day group pattern, and said month group pattern having at least an exhibiting state and a non-exhibiting state, whereby, when said toggle member is in said first position, said first image display includes at least one of said hours group pattern, said minutes group pattern, said day group pattern, and said month group pattern, whereby, when said pattern toggle member is in said second position, said second image display includes another of at least one of said hours group pattern, said minutes group pattern, said day group pattern, and said month group pattern, wherein said first image display and said second image display are visually distinguishable from one another, in combination with the remaining limitations of said claim.

Claim 24 has been found to be allowable over the prior art because the prior art fails to teach or suggest a time display device comprising a pattern toggle member adapted to be placed in a first position and a second position, wherein the first position of the toggle member selects a first image display, and the second position of said toggle member selects a second image display, wherein a hours group pattern, a minutes group pattern, a day group pattern and a month group pattern is of discrete and discernable contrast relative to the display area and is visually distinguishable from the other ones of said hours group pattern, said minutes group pattern, said
